50.00 – 100.00	Very High	Very high antibody titre.
>100	Very High	Very high antibody titre.

COMMENTS / INTERPRETATION :

- Note: In cases of food allergy specific IgE antibodies may be undetectable in spite of convincing clinical history because these antibodies may be directed towards allergens that are altered during industrial food processing, cooking or digestion and therefore do not exist in the food for which the patient is tested.
- Results should be interpreted in relation to the individual case history.
