SEROLOGY**# Musk Antibody**

Sample: Serum

Method: EIA

0.06

Negative : < 1.0

Positive : > 1.0

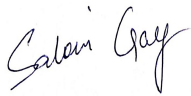

Index

Musk Antibody

Antibodies against striated muscles (MuSK Antibody) - Muscle specific receptor tyrosine kinase. Myasthenia gravis is a generalized autoimmune disease which is mainly caused by disorders of the transmission of neuromuscular stimulation as a result of a reversible blocking of the acetylcholine receptors at the motor end plates. Antibodies against acetylcholine receptors can be found in about 90% of patients. In acetylcholine receptor antibody negative patients, another antibody is identified against MuSK (Muscle specific receptor tyrosine kinase.) Antibody against acetylcholine receptor antibody / MuSK are seen in separate patient groups.

Note :- All value below 0.001 is reported as NOT DETECTED.
