HAEMATOLOGY

Absolute Neutrophil Count (ANC) <i>Sample: Whole Blood EDTA</i>	5000	2000 - 7000	/ μ L
---------------------------------------------------------------------------	------	-------------	-----------

Absolute Neutrophil Count (ANC)

Clinical Significance :

Absolute neutrophil count (ANC) is a measure of the number of neutrophils or polymorphs present in the blood. Neutrophils are a type of white blood cell that fights against infection. Neutropenia or low ANC is seen commonly after chemotherapy for cancer. Neutrophilia or an elevated count is seen commonly in acute inflammatory conditions.
