HAEMATOLOGY

Platelet Count 140 L 150 - 410 thou/µL

Sample: Whole Blood EDTA Method: Impedance

Platelet Count

Clinical Significance:

Platelets or thrombocytes are a cellular component of blood whose function is to stop bleeding by clumping or clotting blood vessel injuries. Low platelet count, also known as Thrombocytopenia, can be either due to less production or increased destruction of platelets. High platelet count or Thrombocytosis can be due to unregulated production, secondary to congenital, reactive or neoplastic conditions.
