	in ulcerative colitis, Primary sclerosing Cholangitis and other diseases.		
	● P-ANCA are also found which do not react with MPO but are directed against other antigens like (Elastase, Cathapsin G, Lysozyme, Lactoferrin).		
	● Formalin resistant p-ANCA indicates the presence of auto antibodies against myeloperoxidase (p-ANCA, MPO) Formalin sensitive p-ANCA indicates the presence of auto antibodies other than myeloperoxidase like elastase, lactoferrin, lysozyme, cathepsin, enolase, β -Glucuronidase & Azurocidine.
